

A message from Protocom CEO, Jason Hart

"Protocom SecureLogin V3 supports more platforms and environments than any other single sign-on product on the market," says Protocom CEO, Jason Hart. "Customers don't have to choose between web single sign-on and host and legacy single sign-on products. Protocom SecureLogin provides all of that functionality in one solution."

Geoff Mather of British Telecom said

"British Telecom's single sign-on project team are impressed with both the suitability of Protocom's SecureLogin product to BT's complex needs and the expertise of the support for the product"

Technical Features	
<b>Comprehensive single sign-on</b> <ul style="list-style-type: none"><li>• Single sign-on and Password Synchronization without application modification</li><li>• Virtually all commercial and homegrown 16 &amp; 32bit Windows and Java applications</li><li>• Internet and Intranet Web &amp; HTTP sites</li><li>• Citrix/Terminal Server</li><li>• UNIX, AS/400 and Mainframe Applications</li><li>• Customized support for DOS applications</li><li>• Integrated with Novell eDirectory, Microsoft Active Directory, NT Domain, NDS, iPlanet and other LDAP compliant directories</li><li>• Windows 95, 98, NT, W2K and XP</li><li>• Supports login, password change, expiry and almost all application error conditions</li></ul>	<b>Security and Remote Access</b> <ul style="list-style-type: none"><li>• Implement consistent password policy</li><li>• Extremely secure - prevents administrator impersonating users</li><li>• All data fully encrypted using industry standards</li><li>• Graded Application and Transaction Access available when deployed in conjunction with SecureLogin Advanced Authentication</li><li>• Eliminate password sniffing when deployed in conjunction with SecureLogin One Time Password Modules</li><li>• Supports internal and external roaming users</li><li>• SNMP application usage/error monitoring</li><li>• Application layer of administration security in addition to ACL data security</li></ul>
<b>Emulators</b> <ul style="list-style-type: none"><li>• Full Support for more than 150 Mainframe, UNIX, ANSI and custom terminal emulators including: all popular 3270 and 5250 emulators from Eicon, WRQ, WallData, IBM, NetManage, JollyGiant, Pericom and many more</li><li>• All popular Telnet emulators from WRQ, IBM, Microsoft, Novell, Teraterm and many more</li><li>• Most Healthcare Emulators – HBO, Meditech, Lawson, 3M and others</li><li>• Vertical market emulators and embedded terminal emulator systems</li><li>• Most ANSI and text based emulators</li><li>• Serial port and IP based emulators</li></ul>	<b>Software Distribution and Administration</b> <ul style="list-style-type: none"><li>• Integrated management with MMC, ConsoleOne, NWADMIN, Standalone tool and other management consoles</li><li>• Simple client distribution via standard tools such as Novell ZENworks, SMS, Tivoli, Unicenter and fully MSI compliant</li><li>• Centralized or decentralized administration with security delegation</li><li>• Built-in support for most popular applications with auto recognition technology and wizards for in-house and other applications including web sites</li><li>• Corporate configuration means application needs only to be configured once for entire company</li></ul>

#### Our Commitment to Excellence

"Our goal is to provide you with the highest quality network security solution"

Protocom Development Systems is committed to providing ongoing training, advice, and support to your technical staff and project management team. To that end, we employ the highest caliber of experienced Project Managers, System Engineers, and Technical Engineers who are dedicated to working through your solution with you. The Protocom Support Department is a 24x7 team devoted to providing world wide support to Protocom clients and products. Help is an email, phone call, or web conference away.

# Protocom SecureLogin™ Single Sign-On

You've got better  
things to do  
than log on

A platform independent single sign-on solution that enhances security and improves efficiency

## Reasons to choose SecureLogin Single Sign-On

**Value for Money** SecureLogin Single Sign-On is the best single sign-on solution available

- How you benefit:**
- Reduces the cost of password administration
  - Increases user productivity, typically achieving return on investment in the first year
  - Easy to install and maintain, and requires no additional hardware or software
  - Leverages your existing investment in software and hardware
  - Licensed on a per user basis

- Protocom understands that:**
- You want a cost effective single sign-on solution
  - You want flexibility, easy maintenance and no 'hidden' costs
  - You want to know all the costs 'up front'

**Flexible** SecureLogin Single Sign-On works in your environment

- How you benefit:**
- Extremely reliable, robust and fault tolerant
  - Highly configurable and integrates with your existing systems and network
  - Provides single sign-on to virtually all Windows, Java, custom, mid-range and mainframe applications as well as intranet and internet sites
  - Works out-of-the-box with all popular server platforms
  - Designed to conform to the highest industry standards
  - Integrates with SecureLogin Advanced Authentication to provide strong authentication when you need it

- Protocom understands that:**
- You need flexibility as your needs evolve
  - You need a single sign-on solution that works in harmony with your environment
  - You want reliability, ease of use, and available, experienced and dedicated support

**Works with your people** SecureLogin Single Sign-On fits your workforce

- How you benefit:**
- SecureLogin Single Sign-On enhances your business processes, without the need to alter existing job functions or workflows
  - Provides single sign-on inside and outside the firewall, even when not connected to the network
  - Provides individualized single sign-on to shared workstations and laptops
  - Detects password expiry and generates random replacements that conform to your security policy, saving time, reducing the hassle, and enhancing security

- Protocom understands that:**
- You want a single sign-on solution that your staff and administrators enjoy and rely on no matter where they work
  - You want a single sign-on solution that is as flexible as your workforce
  - You want to eliminate costly password management for your staff, so they can get on with business

**Easy to implement** SecureLogin Single Sign-On makes deployment, configuration and support easy

- How you benefit:**
- Highly configurable and can be deployed selectively to individual users, groups, and to one or many applications
  - Configured and managed using your existing network management tools providing a central point of administration
  - Requires no changes to your existing network configuration or authentication processes
  - Easily deployed using your standard software distribution products
  - Novell and Microsoft approved

- Protocom understands that:**
- You want effective and efficient deployment
  - You want minimal user impact and minimal additional training
  - You want your single sign-on product to be able to adapt as your needs change
  - You want to pilot software to validate performance and prove return on your investment
  - You want your single sign-on product to be easy for your help desk and Network Administrators

**Enhanced security** SecureLogin Single Sign-On absolutely and consistently enforces your password security policy

- How you benefit:**
- Speeds up the sign-on process and enforces compliance to password security policy
  - Enforces password security for those applications that can not
  - Provides valuable authentication statistics that can be interrogated using your existing monitoring and reporting tools

- Protocom understands that:**
- Your employees have better things to do than login
  - You are concerned about your employees using obvious passwords, or sharing passwords
  - Your security help desk has more important things to do than reset passwords
