

## SenSage Positioned in the Leaders Quadrant for 2009 Security Information and Event Management Magic Quadrant

*Evaluation Based on Completeness of Vision and Ability to Execute In IT Governance, Risk and Compliance Category*

**SAN FRANCISCO, June 2, 2009** - Enterprise software leader SenSage, Inc. today announced it has been positioned by Gartner, Inc. in the leaders quadrant in the 2009 Security Information and Event Management (SIEM) Magic Quadrant<sup>1</sup> report.

- A copy of this full report, compliments of SenSage, can be **accessed here**.

Gartner's research for the Magic Quadrant report showed that Security Information and Event Management (SIEM) technology provides real-time monitoring and historical reporting of security events from networks, systems and applications. SIEM deployments are often funded to address regulatory compliance reporting requirements, but organizations should also use SIEM to improve security operations, threat management and incident response capabilities.

"We believe SenSage's position in the leaders quadrant by Gartner reflects the success we have had in helping our customers meet their targeted needs for security, compliance and operational risk management," said Jim Pflaging, president and CEO of SenSage. "Our unique event data warehouse solutions are easy for customers to implement and use at a much lower cost of ownership compared to other offerings in the market."

The 2009 Magic Quadrant for SIEM evaluates technology providers based on the most common technology selection scenario - a SIEM project that is funded to solve a compliance reporting issue, but with secondary requirements for effective threat monitoring and security event management. Gartner's research also found that broad adoption of SIEM technology is driven by compliance and security needs. New use cases in areas such as application activity monitoring are emerging.<sup>1</sup>

SenSage event data warehouse solutions allow its customers to address emerging security threats, compliance mandates and a host of risk management initiatives at a fraction of the cost of traditional data warehouse and log management offerings. With SenSage, customers can easily capture, retain and query years of data from multiple sources at any detail level to support their business requirements. Suspicious or risky network activity, from outside or inside sources, is visible, customer information is safeguarded and out-of-the-box reports pass the scrutiny of internal auditors.

### About the Magic Quadrant

The Magic Quadrant is copyrighted 2009 by Gartner, Inc. and is reused with permission. The Magic Quadrant is a graphical representation of a marketplace at and for a specific time period. It depicts Gartner's analysis of how certain vendors measure against criteria for that marketplace, as defined by Gartner. Gartner does not endorse any vendor, product or service depicted in the Magic Quadrant, and does not advise technology users to select only those vendors placed in the "Leaders" quadrant. The Magic Quadrant is intended solely as a research tool, and is not meant to be a specific guide to action. Gartner disclaims all warranties, express or implied, with respect to this research, including any warranties of merchantability or fitness for a particular purpose.

### About SenSage

SenSage, Inc. offers patented event data warehouse solutions that provide actionable results from massive amounts of log and event data. More than 400 customers have deployed SenSage solutions to reduce security, fraud and compliance risks at a fraction of the cost of traditional data warehouses and log management solutions. Based in San Francisco, the company markets its solutions directly and

through partners, including Cerner, EMC, HP, Hitachi Data Systems, McAfee, Tokyo Electron Device and many others.
